

HOSTELCO Barcelona 2018:

Perfect solutions for all sectors of the industry

- Visit HOBART at the HOSTELCO (16 – 19 April 2018): Hall 8.0 / Stand D520

Offenburg – At the international trade fair HOSTELCO in Barcelona, HOBART presents its wide range of kitchen equipment which makes the daily work easier, more economical and environmentally friendly. The product portfolio covers all areas of kitchen work, from intelligent warewashing technology to reliable combi steamers.

New glass and dishwashers with unique features

New display with touch screen, unbeatable drying result, warewashing 4.0 with the WASHSMART app: The new features of the enhanced glasswashers and dishwashers by HOBART convince. Short washing times, guaranteed wash results, as well as low water, energy, and chemical consumption complement the overall picture. Especially the TOP-DRY drying ensures a perfect drying result without the need for manual drying and polishing. Eliminating the escape of steam during washing, drying and opening the dishwasher, the machine feature VAPOSTOP² ensures an agreeable room climate. The front of the generation 2018 undercounter models is characterised by their new contemporary design. The VISIOTRONIC-TOUCH control provides a touch display as well as the time-proven single-button control.

Intelligent network with the HOBART app WASHSMART

The HOBART WASHSMART app allows you to call up comprehensive information on the status of the new glasswashers and dishwashers at the push of a button. Among other features, the app informs well in advance of due maintenance dates or chemical consumption and displays any system messages. Based on this data, the user can avoid standstill, re-order consumables directly via the app, and provide first information to the service technician in advance.

Meanwhile, the user can resort to the troubleshooting advice in the app to remedy minor malfunctions themselves. If the problem still cannot be solved, the customer contacts the HOBART customer service or a qualified service partner directly via the app.

The new C-Line – economical yet with premium wash results

With the enhanced rack-type dishwasher series, which will be presented at the Hostelco as well, HOBART offers its customers several meaningful improvements for more efficiency, economy, easier handling, and even better drying results. Additionally, there is the automatic self-cleaning programme as well as the innovative RACK-FLOW sensor system, which doubles the number of racks which can be cleaned consecutively in one-man operation. In addition to being highly reliable and delivering perfect wash results, the new dishwashers are intelligent. The smart machines detect empty sections or different types of wash ware and automatically adapt to the respective situation. This saves operating costs and valuable resources.

Combi steamer: Simplest operation combined with innovative technology

To obtain perfect cooked meals the HOBART combi steamers COMBI and COMBI-plus are automatically controlling the heating by sensors. As soon as the set temperature has been reached, the heating elements are turning off and saving energy. With the help of the FastPAD control the user can store cooking processes with pictures if desired. By pressing one button the COMBI-plus rapidly starts the fully-automatic intensive cleaning cycle, taking just 51 minutes. This means that HOBART offers the shortest cleaning time in the market.
